RELEVANT EXPERIENCE

Acuity Insurance | Sheboygan, WI

June 2023 - Present

Software Engineer - Document Composition

- Led migration of legacy version control system from CVS to GitLab, redesigning branching strategy and CI workflows to improve deployment reliability and developer collaboration.
- Reduced manual operational effort by automating repetitive data processing and release tasks across development and production environments.
- Developed dynamic document templates integrated into enterprise data pipelines, transforming structured data (XML/DB sources) into production-ready customer communications.
- Designed and supported database integrations using ODBC, ensuring reliable data flow between backend systems and document rendering services.
- Engineered and maintained enterprise document generation systems using OpenText Exstream, integrating XML templates with database-driven data pipelines.

Acuity Insurance | Sheboygan, WI

February 2020 - June 2023

Technical Support Analyst - Intern

- Administered asset management processes for 1,000+ enterprise devices, improving inventory accuracy and lifecycle tracking.
- Collaborated within Agile/Scrum teams to deliver technical solutions aligned with business requirements.
- Developed automation scripts in PowerShell, Batch, and Python to streamline system configuration, deployment, and reporting tasks.
- Leveraged SCCM to deploy standardized system images and enforce configuration policies.

TECHNICAL SKILLS

Languages (ordered by proficiency): Java, Python, SQL (Postgres, Microsoft SQL Server, MongoDB), Javascript (Typescript, React), Bash & Powershell, HTML / CSS.

Tools and Frameworks: Maven, Gradle, Pandas, numpy, Docker, Git, Ansible, Nginx, Terraform, Node.js, React.js, Tailwind CSS, npm, Typescript

EDUCATION

Lakeland University | Plymouth, WI

May 2023

B.S. in Computer Science, Focus on Software Development | GPA: 3.5/4.0

- **Relevant Courses:** Data Structures & Algorithms, Data management & Warehousing, OOP Programming 1 & 2, Artificial Intelligence, Computer Architecture, System Analysis and Design, Advanced Programming, Data Warehousing.

Lakeshore Technical College | Cleveland, WI

May 2021

A.S. in IT Networking | GPA: 3.5/4.0

- **Relevant Courses:** Networking 1-4, Network Security, Server Administration 1 & 2, Linux, Network Design and Documentation, Network Security

PROJECTS

Portfolio-Website | Personal Project | <https://velier.dev>

Mar. 2026

- Designed and deployed a personal portfolio site using React and Tailwind CSS, hosted on Vercel with a custom domain
- Diagnosed and resolved a broken webpack/CRA build environment by migrating the project to Vite, reducing dev server startup time by over 80%
- Architected a reusable React "ThemePicker" component that dynamically applies site-wide color themes via Tailwind CSS class injection and React context
- Built a dynamic project filtering system in React that automatically populates filter tags based on each project's tech stack, enabling users to sort and browse projects by technology

TwitchAnalyticsClient | Personal Full-stack Project

Nov 2021

- Architected a two-component analytics platform — a Python data pipeline and a TypeScript API server — communicating through a shared PostgreSQL schema with no direct coupling
- Containerized a Python application using Docker and Docker Compose with automatic restart policies for continuous 24/7 operation on a self-hosted Linux-based server.
- Optimized PostgreSQL query performance using materialized views and composite indexes, reducing analytics query response time from timeout to sub-millisecond
